

BENELLI SHOTGUNS

1997

Super Black Eagle Shotguns

Imagine the advantages of shooting one shotgun... with the same swing, balance, and point of impact whether you are hunting geese, quail, or practicing on the clay pigeon field.

As the first—and only semi-automatic shotgun made to fire the 3½ inch load, the Super Black Eagle highlights the benefits of owning one shotgun that fires the widest range of 12 gauge shells. And in an era of mandatory steel shot use, the advantages of 3½ inch loads and the Super Black Eagle are undeniable.

The Super Black Eagle shotgun is chambered for the potent 3½ inch 12 gauge, a load that virtually equals the performance of 10 gauge shells, plus it also handles 3 inch or 2¾ inch 1⅛ ounce field loads and most target shells as well.

At the heart of the Super Black Eagle is the famous Montefeltro rotating bolt, the same operating system found on all HK Benelli shotguns.

A rugged and simple inertia recoil design, this bolt system functions reliably with standard 12 gauge shells without adjustment—whether they're 2¾ inch target loads or powerful 3½ inch magnums.

The entire Benelli operating system is in the bolt. Unlike most semi-automatic shotguns, there is no complicated gas system to become fouled with powder residues. There are no complex linkages, bulky inertia weight, or fragile "O" rings to clean and maintain.

A shim kit is supplied with all Super Black Eagle shotguns, allowing the stock drop to be adjusted to suit individual shooting styles.

The choice of either satin walnut stocks or tough synthetic field stocks make the Super Black Eagle the universal gun for all shotgun hunting and sports.

Equipped with a polymer stock and forearm, the Super Black Eagle is especially durable.

When a Benelli shotgun is fired, a spring positioned between the bolt head and the bolt carrier is compressed by the inertia of the bolt carrier as the gun begins to recoil. When this spring is fully compressed, it overcomes the forward inertia of the bolt carrier and pushes it to the rear — unlocking the bolt head, extracting the fired shell, recocking the gun, and chambering a fresh shell. The inertial action of the bolt carrier creates the delay which allows the shot column or slug to clear the bore prior to the bolt head rotating into the unlocked position...safe, simple, and fast!

SUPER BLACK EAGLE with 28-inch barrel, matte finish and satin stock, also available with 26-inch barrel

The alloy lower receiver keeps the overall weight low, making the Super Black Eagle well balanced and naturally pointable.

Built to stand up to the toughest shotgunning, the Super Black Eagle uses a strengthened steel upper receiver permanently mated to the barrel.

SUPER BLACK EAGLE with 26-inch barrel, blued metal finish & satin stock

The cartridge drop lever on a Benelli shotgun acts as a "hammer cocked" indicator.

SUPER BLACK EAGLE with 28-inch barrel, matte metal finish, and polymer stock. Also available with 26- and 24-inch barrels

Benelli free shell carrier feature allows the shooter to remove or replace a shell in the chamber without emptying the entire magazine. This gives the Super Black Eagle shotgun unmatched flexibility. An inappropriate load can be quickly substituted for a more suitable ammunition type. And if a shell slips onto the carrier, the Super Black Eagle will fire and cycle normally, a condition that would jam most autoloading shotguns.

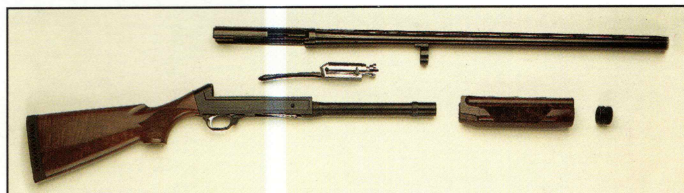

Super Black Eagle shotguns come with a full set of five choke tubes and choke wrench to meet any target or hunting need.

SUPER BLACK EAGLE with 26-inch barrel, matte metal finish, and polymer stock. Also available with 28 and 24-inch barrels.

Simple, reliable trigger mechanism ensures a crisp and positive operation on all Super Black Eagle shotguns

All Super Black Eagle shotguns strip down to their major components in seconds without tools.

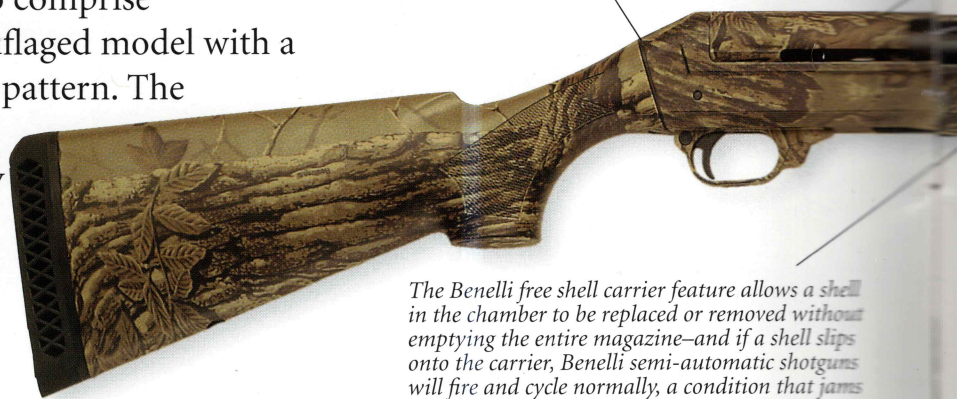

Super Black Eagle Shotguns (specialized models)

The Benelli Super Black Eagle series also comprise specialized shotguns, including a camouflaged model with a tough utilitarian Realtree™ Xtra Brown pattern. The camouflage pattern is sealed onto the matte finish metal and polymer stock by a special industrial process that bonds the camouflage color scheme to the gun even when subject to strong abrasion and chemical solvents. Best of all, the camouflage models have all of the characteristics that go into making the Benelli Super Black Eagle the finest semi-automatic in the world today.

Like other Benelli elite grade guns, the Super Black Eagle Limited Edition is manufactured using the finest materials available. The simple inertia operating system means dependable function and low recoil. The light weight nickel-plated receiver is finely etched with classic scrolling and game scenes, tastefully highlighted with gold. The select grade walnut stock is drop adjustable for a custom fit. A 26-inch vent rib barrel ensures excellent balance and handling. And with only 1,000 guns being made, the Benelli Super Black Eagle Limited Edition promises to be highly collectable.

For accurate, long distance shotgunning, HK designed a Super Black Eagle Slug Gun with a custom made E.R. Shaw rifled barrel and a receiver scope mount base. The thick walled, fast twist custom barrel is specifically designed for optimal accuracy with modern high velocity "sabot" type slugs.

A shim kit is also supplied which allows the stock drop to be adjusted to suit individual shooting styles.

The Benelli free shell carrier feature allows a shell in the chamber to be replaced or removed without emptying the entire magazine—and if a shell slips onto the carrier, Benelli semi-automatic shotguns will fire and cycle normally, a condition that jams most autoloading shotguns.

The select grade walnut stock is drop adjustable for a custom fit.

On all Benelli semi-automatic shotguns, the cartridge the cartridge drop lever acts as a "hammer cocked" indicator.

For accurate, long distance shotgunning, HK designed a Super Black Eagle Slug Gun with a custom made E.R. Shaw rifled barrel and a receiver scope mount base.

Also available with polymer buttstock and forearm

Built to stand up to the toughest shotgunning, the Super Black Eagle uses a strengthened steel upper receiver permanently mated to the barrel.

NEW

SUPER BLACK EAGLE CAMO SHOTGUN with 28-inch barrel (26- and 24-inch models also available)

Super durable Realtree™ Xtra Brown camouflage finish makes the gun virtually invisible to game.

The Limited Edition Super Black Eagle is manufactured using the finest materials available. The simple inertia operating system means dependable function and low recoil. The light weight nickel-plated receiver is finely etched with classic scrolling and game scenes, tastefully highlighted with 24 karat gold.

The nickel-plated receiver of the Super Black Eagle Limited Edition is etched and highlighted with gold.

SUPER BLACK EAGLE LIMITED EDITION with 26-inch barrel

The alloy lower receiver keeps the overall weight low, making the Super Black Eagle well balanced and naturally pointable.

Right side of the nickel-plated receiver of the Super Black Eagle Limited Edition. The etching, highlighted with gold, is the work of noted Italian engraver Bottega Incisioni di Cesare Giovanelli.

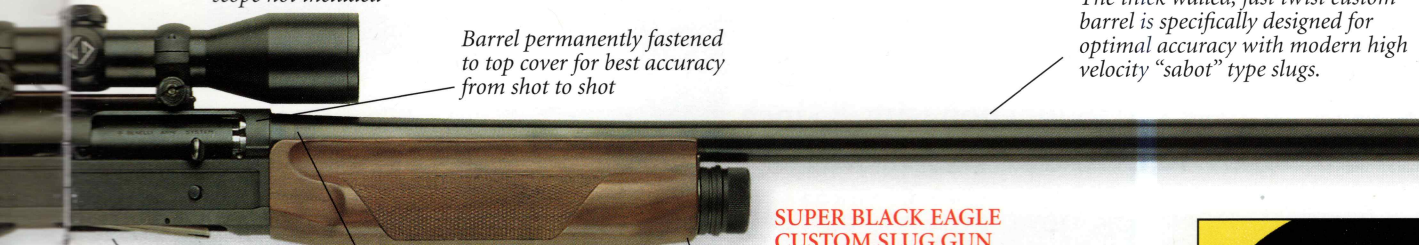

Super Black Eagle shotguns come with a full set of five choke tubes to meet any target or hunting need.

A 26-inch vent rib barrel ensures excellent balance and handling.

NEW

Barrel permanently fastened to top cover for best accuracy from shot to shot

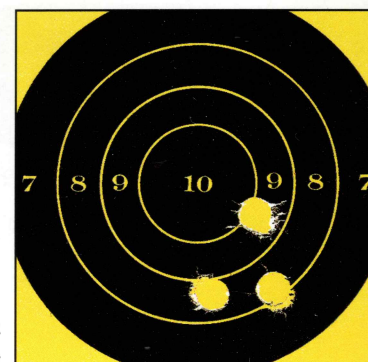

The thick walled, fast twist custom barrel is specifically designed for optimal accuracy with modern high velocity "sabot" type slugs.

SUPER BLACK EAGLE CUSTOM SLUG GUN with 24-inch rifled barrel

For optimal accuracy all slug barrels use a 3-inch chamber

The Super Black Eagle Slug Gun is the ideal deer hunting shotgun.

Note: use of an accessory rifled barrel requires the installation of a modified forearm.

Super Black Eagle Slug Gun accuracy. 12 gauge 3-inch sabot slug at 100 meters.

Executive, Sport & Black Eagle Models

The HK Benelli Executive Series hold an exclusive position. These special order firearms are designed and manufactured with the same high level of technical accomplishment as all Benelli shotguns, but with the most exceptional materials available. Each Executive Series shotgun has an all steel lower receiver hand engraved by Bottega Incisoni di Cesare Giovannelli, one of Italy's preeminent engravers. The Executive Type III includes esthetic gold inlay. The Executive Series is engineered with all the features found on the Black Eagle Series shotgun but is distinguished by its luxury appointments. A truly beautiful firearm, the Benelli Executive Series shotguns will deliver shooting pleasure through a lifetime.

The newest addition to the Benelli lineup is the innovative Sport model. The first shotgun with removable, interchangeable carbon fiber ventilated ribs the Sport promises new flexibility to the shotgun sportsman—and delivers with custom features like an adjustable butt pad, adjustable buttstock, and the ability to shoot ultra light target loads. Just adding a few of the options, makes the Sport model the ultimate sporting clays and skeet gun.

Premium grade sporting shotguns, the Black Eagle series combines the advanced technology of the Super 90 system with the classic design found on vintage Benelli semi-automatic shotguns. A machined steel upper receiver, coupled with a lightweight alloy lower receiver, provide the unique blend of durability and balance required by serious shooters. Black Eagle models feature 3-inch chambers, but like all Benelli autoloaders, are designed to function with 2¾ inch target and light target loads as well.

Highlights on the Competition model include cut checkering, select walnut stocks, and a tastefully etched lower receiver. A midrib bead and international style recoil pad complete the list of special features serious target shooters demand.

The highest grade of walnut wood stocks are selected for their attractiveness and strength, and each can be custom fitted by the addition of the drop adjustment kit.

Buttstock drop can be adjusted simply by changing shims and spacers.

Oil finish stock

Adjustable butt pad allows length of pull changes

Select walnut stock with cut checkering

International style recoil pad

Machined steel upper receiver and alloy lower receiver for a combination of strength and light weight

Each Executive Series shotgun has an all steel lower receiver hand engraved by Bottega Incisori di Cesare Giovanelli, one of Italy's preeminent engravers. The Executive Type III includes esthetic gold inlay.

Executive Type I receiver detail

Executive Type II receiver detail

EXECUTIVE SERIES TYPE III SHOTGUN with 26-inch barrel

The cartridge drop lever acts as a "hammer cocked" indicator on all Benelli shotguns.

Three interchangeable ribs (high-broadway-low) are available for the widest variety of shotgun target sports

Middle bead on high and low ribs preferred by American trap and skeet shooters

Ultra-light, tough carbon fiber ribs do not conduct heat like metal ribs.

Five choke tubes and a choke wrench are standard equipment on all Benelli sporting shotguns.

Reliable Benelli operating system fires 3 and 2³/₄ inch shells including ultra light target loads

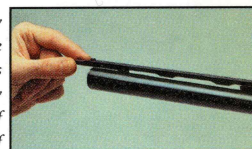

NEW

SPORT MODEL SHOTGUN with 28-inch barrel

Optional shell catcher captures empty hull for trap shooters

Montefeltro style forearm allows shooters a comfortable forward hand hold

The new Benelli SPORT model is the first and only shotgun in the world with interchangeable ribs. The accessory carbon fiber ribs can be changed in minutes by removing a single screw. Interchangeable ribs allow the SPORT to be adapted to any type of shotgunning—and combined with the reliability of the semi-automatic Benelli inertia recoil system means real versatility!

Machined steel upper receiver

3 inch chamber handles 3 inch and standard 2³/₄ inch loads above 1¹/₈ ounces dependably

Mid-rib bead

BLACK EAGLE COMPETITION GUN with 28-inch barrel, 26-inch barrel model also available

Alloy lower receiver with classic etching

Slimline forearm

Accessory 21 and 24-inch barrels available

All Black Eagle type shotguns have a machined steel upper receiver for a durability

BLACK EAGLE with 28-inch barrel, 26-inch barrel model also available

The light weight alloy lower receiver provides balance without sacrificing durability. It also contributes to the natural pointability of the Black Eagle series.

Montefeltro Super 90 Shotguns

No other semi-automatic shotgun shoots more reliably than the Benelli Montefeltro Super 90 shotgun. A direct descendant of the M1 Super 90 shotgun, the Montefeltro introduces sleek, traditional styling to a combat-proven design.

The twin steel locking lugs of the simple bolt system lock into the barrel just like a bolt action rifle. Dependable functioning with standard 12 gauge shells, whether light 2¾ inch target loads* or potent 3 inch magnums, is assured.

Unlike most semi-automatics, there is no complicated gas system that collects grime and powder residues. No complex linkages and pistons to clean and maintain. Plus the Montefeltro disassembles completely without tools for easy cleaning and maintenance.

Each Montefeltro Super 90 shotgun is equipped with a set of five screw-in choke tubes. And with the special drop adjustment kit, the durable walnut stock can be custom-fitted to any shooter without modifying the wood.

A versatile loading system, unique to Benelli, enables

you to change a shell in the chamber independent of the shells in the magazine. This means you can safely unload the chamber without emptying the entire magazine—or quickly replace the shell in the chamber with a different load.

**1⅛ ounce load for optimal functioning*

Montefeltro Super 90 shotguns have satin finish walnut buttstocks and forearms

A simple, durable, and easy to maintain trigger assembly is standard on all HK/Benelli shotguns.

Premium recoil pad are standard on all Montefeltros Super 90 shotguns.

A set of shims and spacers allow each Montefeltro sporting shotgun to be custom-fitted.

MONTEFELTRO SUPER 90 LEFT HAND MODEL
with 26-inch barrel, also available with 28-inch barrel

The choice of a 24 or 26-inch vent rib barrel maintains the proper overall balance, and stock drop is adjustable for a custom fit.

At 5¾ pounds the 20 gauge Montefeltro is extremely light weight—and delivers the famous Benelli reliability with light recoil.

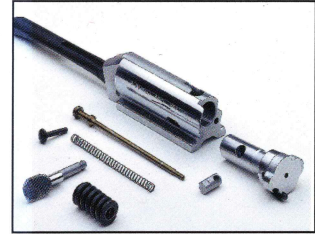

The 20 gauge Benelli Montefeltro Super 90 handles all standard 20 gauge 3 inch and 2¾ inch shells.

Montefeltro Super 90 shotguns are light weight, well balanced, and extremely fast handling.

MONTEFELTRO SUPER 90 with 28-inch barrel

When a Benelli shotgun is fired, a spring positioned between the bolt head and the bolt carrier is compressed by the inertia of the bolt carrier as the gun begins to recoil. When this spring is fully compressed, it overcomes the forward inertia of the bolt carrier and pushes it to the rear — unlocking the bolt head, extracting the fired shell, recocking the gun, and chambering a fresh shell. The inertial action of the bolt carrier creates the delay which allows the shot column or slug to clear the bore prior to the bolt head rotating into the unlocked position... Safe, simple, and fast!

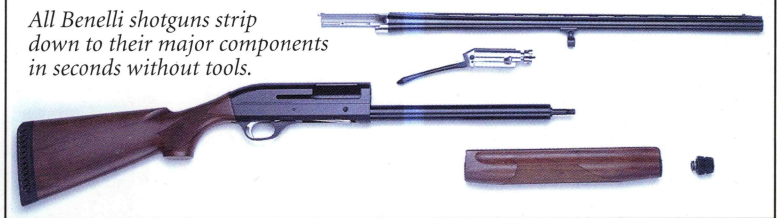

Bolts on Montefeltro Super 90 shotguns are chromed

MONTEFELTRO SUPER 90 with 26-inch barrel

A feature common to all Benelli semi-automatics is the ability to remove or replace a shell in the chamber without emptying the entire magazine. An inappropriate load can be quickly substituted for a more suitable ammunition type. And if a shell inadvertently slips onto the carrier, Benelli shotguns will fire and cycle normally, a condition that would jam most autoloading shotguns.

All Benelli shotguns strip down to their major components in seconds without tools.

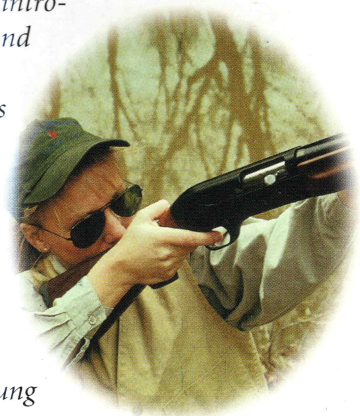

Montefeltro Super 90 shotguns have ultra slim forearms because the magazine tube isn't surrounded by a bulky gas piston or wraparound spring. The entire operating system is contained in the simple bolt.

20 GAUGE MONTEFELTRO SUPER 90 with 24-inch barrel, also available with 26-inch barrel

Each Benelli Sporting Shotgun comes complete with a set of five screw-in choke tubes and a choke tube wrench.

The 12 gauge Benelli Montefeltro was first introduced to U.S. shooters in 1987. Its simple and dependable inertia action coupled with superb balance and pointing characteristics made it an instant success. The 20 gauge Montefeltro packs all these advantages in a smaller, lighter, even faster handling package! Tipping the scales at only 5¾ pounds, this model is the perfect lightweight companion for a long day in the field. The light recoil of the 20 gauge semi-automatic makes it a natural choice for young shooters and women.

M1 Field & Sporting Special Shotguns

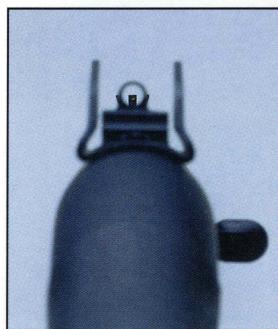

The M1 Field unites the quick handling M1 Super 90 receiver with a choice of polymer or walnut stocks and a variety of ventilated rib sporting barrels. A complete set of steel shot tested chokes gives the M1 Field unmatched flexibility for hunting under the toughest conditions imaginable.

The fast firing reliability that makes the M1 Super 90 the preferred choice of law enforcement professionals is found on all M1 Field and Sporting Special shotguns.

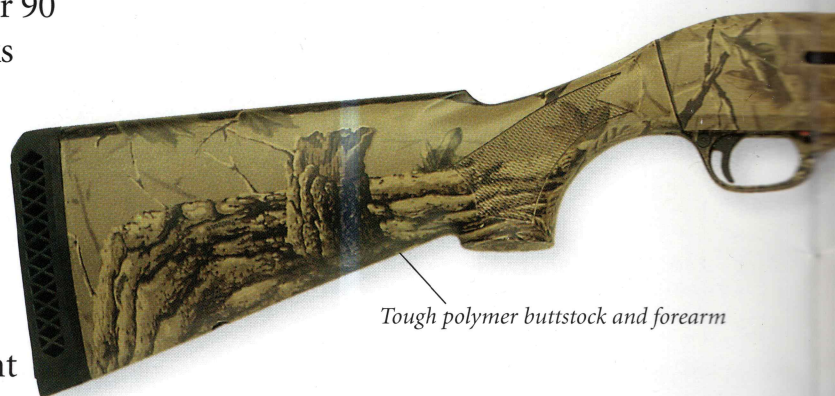

The famous Montefeltro inertia bolt system ensures dependable operation with all standard 12 gauge shells, from light 2¾ inch field loads* to the most powerful 3 inch magnums—all will function dependably in the M1 Super 90 Field and the M1 Sporting Special.

*1⅛ ounce load for optimal functioning

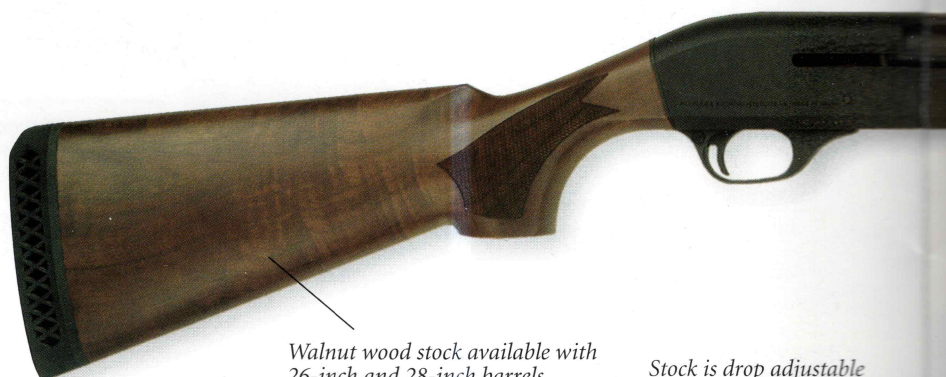

Originally developed for law enforcement and military use, the ghost ring sighting system found on Benelli security shotguns is also available for shotgun hunters on the M1 Sporting Special.

The ghost ring sighting system enables a shooter to keep both eyes open while focusing on the front sight. The rear sight becomes a softly focused "ghost ring" image to the shooter. This innovative sighting system ensures fast and effective target acquisition.

Tough polymer buttstock and forearm

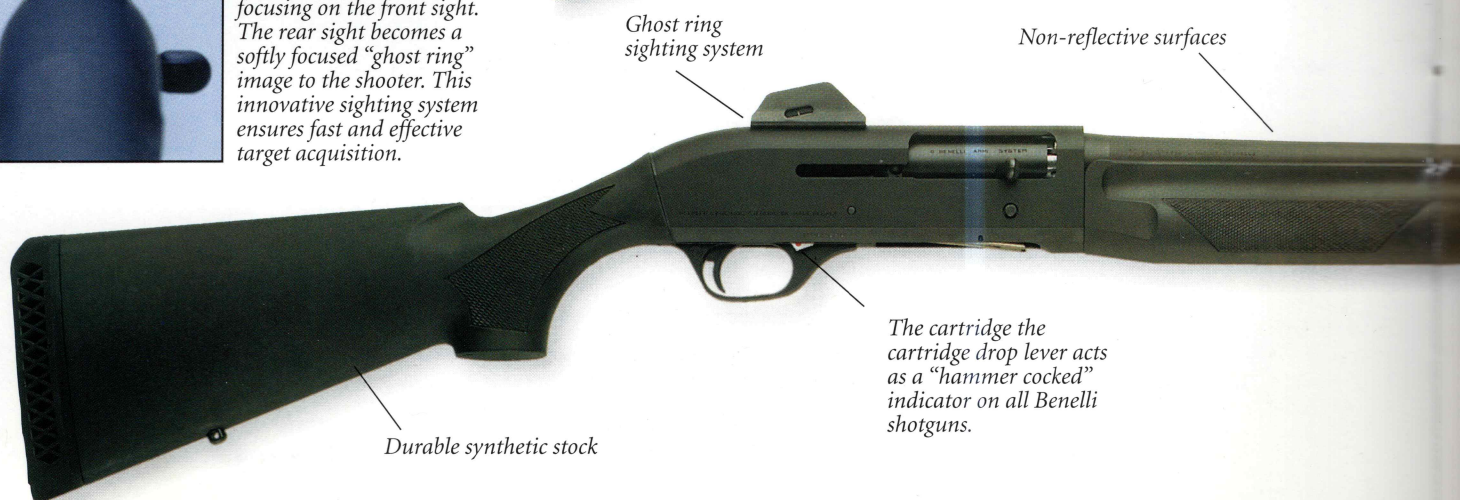

Walnut wood stock available with 26-inch and 28-inch barrels

Stock is drop adjustable

Polymer stock also available on M1 Field 21-inch, 24-inch, and 28-inch models

Durable synthetic stock

Ghost ring sighting system

Non-reflective surfaces

The cartridge the cartridge drop lever acts as a "hammer cocked" indicator on all Benelli shotguns.

NEW

Durable Realtree™ Xtra Brown camouflage pattern makes this M1 almost invisible for turkey and waterfowl hunting.

M1 SUPER 90 CAMOUFLAGE FIELD SHOTGUN
with 28-inch barrel and polymer stock

Stepped rib ventilated barrels are standard on all M1 Field shotguns.

M1 SUPER 90 FIELD
with satin finish walnut stock and 26-inch barrel

The Benelli's free carrier means fast, one-handed reloading to match the M1's fast-firing capabilities.

M1 Field shotguns come with a full set of five choke tubes and a choke wrench.

The same reliable inertia operating system found on all Benelli semi-automatic shotguns ensures dependable function with 3 inch and 2 3/4 inch shells.

A chrome lined barrel, corrosion resistant finish, and a high strength polymer stock make the M1 one of the toughest and most functional shotguns in the world.

M1 SUPER 90 FIELD SHOTGUN with 26-inch barrel
and polymer stock

The ability to remove or replace a shell in the chamber without emptying the entire magazine gives the M1 shotgun unmatched tactical flexibility. An inappropriate load can be quickly substituted for a more suitable ammunition type. And if a shell inadvertently slips onto the carrier, the Benelli will fire and cycle normally, a condition that would jam most autoloading shotguns.

Short maneuverable barrel is ideal for turkey and deer hunters

Ghost ring sights ensure fast and precise centering of the pattern on the target

M1 SPORTING SPECIAL

Sling swivel

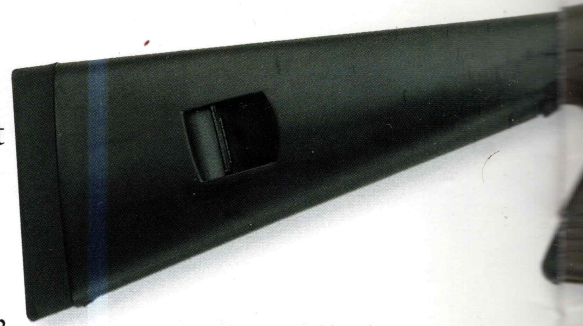

The M1 Sporting Special comes with three chokes (Improved Cylinder, Modified, and Full). An optional "extra full" tube is also available. A quick change to an "IC" tube converts the Sporting Special from a turkey gun to an accurate slug gun for deer or a personal defense arm.

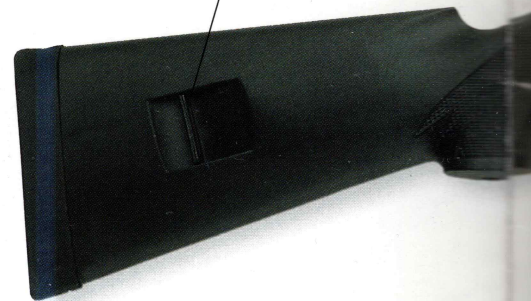

Benelli Security Shotguns

Reliability and speed are the hallmarks of Benelli shotguns. The M1 Super 90 can fire five rounds in less than one second. Any standard 12 gauge shell, from light 2¾ inch field loads to the most powerful 3 inch magnums, will function dependably in the M1. Chrome lined barrels, corrosion resistant finishes, and high strength polymer buttstocks make Benelli shotguns among the toughest and most functional in the world. Several barrel options, ghost ring sights, and buttstock choices allow Benelli shotguns to be adapted to any tactical application.

The M3 Super 90 shotgun combines the unique features of the semi-automatic Benelli M1 shotgun with the added flexibility of a manual pump action. Like all Super 90 security shotguns, the Benelli M3 is designed to operate under the most adverse conditions.

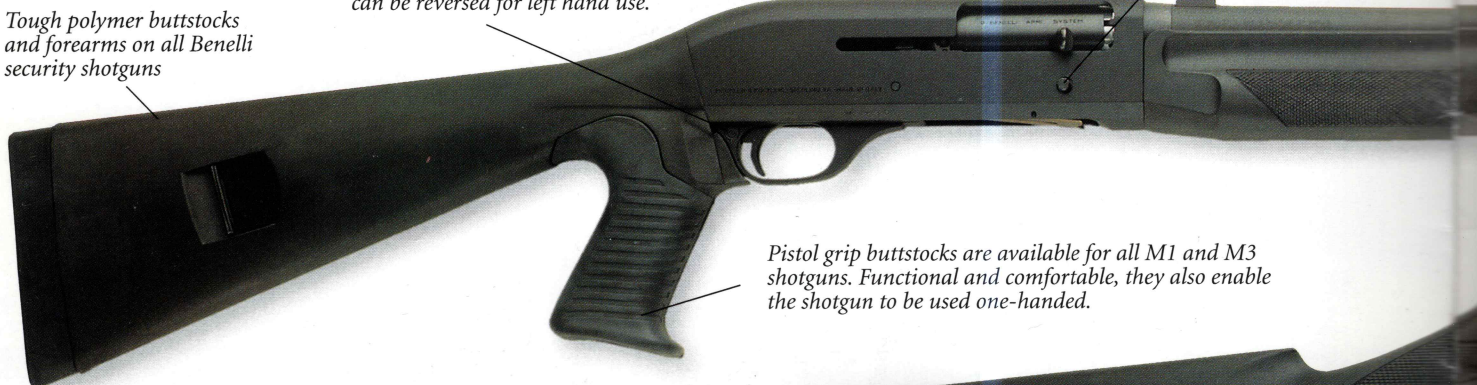

Sling swivel hardware allows a variety of sling mounting options

Bolt release button

Tough polymer buttstocks and forearms on all Benelli security shotguns

Positive cross bolt safety button can be reversed for left hand use.

Pistol grip buttstocks are available for all M1 and M3 shotguns. Functional and comfortable, they also enable the shotgun to be used one-handed.

Heavy duty recoil pads are standard on all Benelli security shotguns

The HK Universal Shotgun Mount makes it possible to install the HK UTL (Universal Tactical Light) to virtually any shotgun.

**M3 COMBINATION
PUMP/AUTOMATIC**

Functions with all standard loads in the "auto" mode, as well as gas grenades, flares, and non-lethal ammunition in the "pump" mode.

Accessories & Collectibles

An extensive line of accessories is available for HK/Benelli shotguns. Designed and manufactured to the same exacting standards, HK/Benelli accessories add functionality and highlight the true systems approach used in developing these shotguns. Contact HK, Inc. for more information.

*Magazine capacity given for 2.75 inch shells, size variations among some brands may result in less capacity. **Skeet, Improved Cylinder, Modified, Improved Modified, Full

***CAUTION: Increasing magazine capacity to more than five rounds on M1 shotguns with pistol grip stocks violates provisions of the 1994 Crime Bill. Specifications & models subject to change without notice.

Heckler & Koch, Inc. and Benelli Armi

Heckler & Koch, Inc. is a significant force in the development and production of a wide range of technologically advanced firearms for sporting, defense, and law enforcement use.

In addition to famous HK weapons like the MP5 submachine gun and USP pistol, Heckler & Koch is also the exclusive American distributor for Benelli semiautomatic shotguns—including the Super Black Eagle, the world's only 12 gauge semiautomatic that shoots 3½ inch, 3 inch, and 2¾ inch shells. HK, Inc. sales and support activities cover the full range of the Benelli shotgun line, more than forty different types, including shotguns for competition, hunting, and security use.

Based in Urbino, Italy, Benelli Armi's modern design and manufacturing facilities are located at the foot of the medieval castle of the Duke of Montefeltro. Here the classic traditions of 14th century

weapons crafting meet the precision engineering of the 21st century. The semi-automatic shotguns developed by Benelli Armi are recognized as the most innovative in the world.

Operating from facilities in Sterling, Virginia, just outside Washington D.C., HK, Inc. serves a variety of customers, including the American military, Federal and local law enforcement, and the civilian firearms market.

HK Pledges \$1 Per Gun for Gun Rights

Heckler & Koch is dedicated to preserving the rights of Americans to own and use firearms for sport, hunting, recreation, and self defense. Threats to our rights as gun owners will continue, and to help counter those challenges HK pledges to donate \$1 for each firearm sold in 1997 to the American Shooting Sports Council. The ASSC supports pro-gun efforts at both the national and local level and helps protect the rights of all gun owners.

HK International Training Division

Professional training could mean the difference between life and death. At Heckler & Koch, we are committed to providing thorough and comprehensive instruction of the highest standard. HK Weapons, Tactical, and Armors Training Courses are designed as intensive, hands-on classes for the military and law enforcement community. All HK

training courses combine elements of practical instruction and theory for an innovative and valuable learning experience.

Classes are held at HK-operated facilities in Northern Virginia, located near Washington, D.C. HK Mobile Training Units also travel throughout the country providing many of the same courses at remote locations. For more information on scheduled courses, or arranging special on-site instruction, contact the Training Division office at (703) 450-1900 extension 293.

HK Videos

Before you buy your next pistol or shotgun, why not watch a little TV first. See the 40-minute HK P7/Benelli shotgun or 22-minute USP video tapes to find out why these firearms are so uncompromising!
