What's New

Heckler & Koch was awarded the largest pistol contract in Law Enforcement history by the U.S. Department of Homeland Security (DHS) Office of Immigration and Customs Enforcement (ICE). Three models were selected for this contract after exhaustive and punishing battery testing. This includes the USP Compact LEM, the P2000 and the P2000 SK Subcompact. Each of the three models was chosen in calibers 9x19mm, .40 S&W and .357 SIG and employ HK's innovative LEM trigger system.

The HK pistols earned a "Superior" technical rating after more than three million rounds of ammunition were fired through 690 handguns of 46 different models from five different companies during four months of testing. This shows that HK handguns have the reliability, environmental, accuracy and durability you expect in a handgun.

Individual Officer Program

Heckler & Koch Inc. is now offering an exclusive Professional Law Enforcement Purchase Program, which will now include individuals involved with Homeland Security.

This program will give the opportunity to those individuals who meet the criteria of working with an official police department or security agency. This program is honored directly through Heckler & Koch Inc. dealers and distributors at special pricing.

Polygonal bore profile for increased velocity, easier cleaning, and longer barrel life

Ambidextrous slide release (located on both sides of the frame)

Polymer recoil absorber bushing aids in recoil reduction

Industry-standard mounting rails allows a wide selection of accessories to be installed (ITI model light shown below)

Ambidextrous magazine release lever

P2000 .40 S&W
with 12-round metal magazine
(9mm P2000 model also available)

NEW

DA/SA variant of the P2000 and P2000 SK Subcompact is readily identifiable by the presence of the serrated button and spurred hammer (left pistol). LEM (DAO) model appears on right.

Extractor doubles as loaded chamber indicator on all P2000 and P2000 SK Subcompacts

"Slick-sided" LEM mode

Oversized tapered trigger guard for use with gloves

NEW

P2000 SK SUBCOMPACT 9MM
with 10-round magazine

Uses special subcompact magazines* as well as widely available USP Compact magazines.

*capacity on 9mm is 10 rounds, .40 caliber is 9 rounds

Set of abbreviated "industry standard" mounting rails allow lights, aimers, and other accessories to be easily installed by sliding them onto the open rail system

Extended rubber floorplate magazines improve grip retention

Low profile slide and slimline,
compact dimensions

Optional magazine disconnect
safety available

Trigger pull on LEM models is 7.3-8.5
pounds of pressure compared to 12-15
pounds found on many conventional
double action pistols. Optional adjustment
(by HK armors) can bring the trigger pull
into the 5.5 pound range.

Modular grip with exchangeable back
straps to easily adjust the grip size to the
shooter's hand

Corrosion proof reinforced
polymer frame

Patented Lock-Out Safety device

P2000 uses widely
available, reliable USP
Compact magazines

Corrosion resistant "Hostile
Environment" blued finish on all
P2000 and P2000 SK Subcompacts

Polygonal bore profile

Three dot sights for quick
target acquisition, optional
tritium sights available

Ambidextrous slide
release levers

Exchangeable
back strap for
modular grip

Finger rest
molded into
grip

NEW

Patented Lock-Out
Safety device

P2000 & P2000 SK Subcompact

New for 2004 is the P2000 SK Sub-Compact pistol. Identical in every respect to the P2000 Compact, this new version is destined to become an instant favorite for shooters needing a smaller framed gun for lighter weight, particularly in concealed carry situations. Built on a rugged corrosion proof fiber-reinforced frame both models feature HK's patented pre-cocked hammer LEM trigger system. This system combines the advantages of a constant trigger pull with a shorter trigger travel for each round fired. This enhanced LEM trigger system offers the crisp trigger pull of a single action, with the rock solid reliability of a double-action pistol. This reduces the P2000 SK Subcompact trigger pull to 7.3-8.5 pounds of pressure (32.5 Newtons), compared to 12-15 pounds found on many conventional double action pistols. Optional adjustment (by HK armors) can bring the trigger pull into the 5.5 pound range.

Other shared features include an innovative trigger guard design, that perfectly guides your finger to the trigger, or slide further back to engage the ambidextrous magazine release. Standard equipment exclusive to P2000 pistols include HK's new modular grip. Fitted with interchangeable back straps (4 for the P2000, 2 for the SK Sub-Compact); it makes P2000 pistols able to accommodate almost any size hand comfortably. Also included is our standard mounting rail so your P2000 is ready to carry a complete line-up of accessories.

The new P2000 SK Sub-Compact and P2000 Compact pistols: lightweight, rugged, accurate and reliable—everything a compact pistol should be!

P2000 SK SUBCOMPACT .40 S&W
with 9-round magazine

USP Compact Pistols

The HK USP Compact is a small frame pistol capable of firing the most powerful cartridges in 9mm, .357 SIG, .40 S&W, and .45 ACP. Based on the full-size USP models, these handy pistols combine compact size with optimum effective shooting performance.

USP Compacts are smaller and lighter than large frame USPs. The reduction in trigger reach and grip circumference increases concealability and enhances shooting ergonomics. Unlike some subcompact semi-automatic pistols that use a difficult to shoot "two-finger grip" frame, the USP Compact

uses a narrow, full-hand grip frame with a choice of interchangeable extended or flush-fitting magazine floorplates. This makes the pistol easy to shoot without sacrificing concealability.

Like their large frame predecessors, USP Compacts are designed with the demanding needs of the American shooter in mind. Features favored by the U.S. military, law enforcement agencies, and civilian users provided the design criteria for both the full size USP and the USP Compact.

All variants of the USP Compact have modified

Extractor doubles as loaded chamber indicator

Low profile 3-dot sights, adjustable for windage and elevation, are standard on the USP Compact. Optional tritium sights are also available.

Black "Hostile Environment" finish resists corrosion and abrasion

USP9 COMPACT 9MM
with 13-round metal magazine

USP Compacts have an ambidextrous magazine release lever which is shielded by the flared trigger guard from inadvertent actuation. The magazine release lever can be pressed with the thumb or index finger of the firing hand, without adjusting the firing grip.

Optional flat magazine floorplate

Highly contoured frame, slide, and operating controls reduce wear and tear on clothing and help speed holstering.

All variants of the USP Compact have a modified contoured slide and frame for effective concealability. Variants 1-7 also have a no snag, bobbed hammer.

The extended slide release is contoured to reduce wear and tear on clothing when the pistol is carried concealed.

Flared recurve trigger guard

USP45 Compact model is only 5% larger than 9mm and .40 caliber Compact models.

Extended magazine floorplate

Optional 10-round magazine available

The USP control lever has a positive stop and automatically returns to the "fire" position after decocking. The control lever, featured on many variants of the USP and USP Compact, allows these pistols to be safely carried "cocked and locked."

USP45 COMPACT CALIBER .45 ACP
with 8-round metal magazine

CONVERTIBLE FIRE MODES AND CONTROLS

*Law Enforcement Modification (standard availability on .40 S&W and 9mm, special order on other calibers)

The USP Compact can also be converted from one type of trigger firing mode to another. This includes combination double-action and single-action modes and double action only modes. The USP Compact is currently available in four calibers and nine trigger / firing mode configurations, including the HK-developed LEM (Law Enforcement Modification) mode.

contoured slide and frame for effective concealability. Variants 1-7 also have a no snag, bobbed hammer. The extended slide release is contoured to reduce wear and tear on clothing when the pistol is carried concealed.

Using a modified linkless Browning-type action, the USP Compact is built to take the punishment of high energy +P and +P+ loads.

To reduce the length of the slide and barrel on the USP Compact, the mechanical recoil reduction system found on large frame USPs has been replaced by a specially designed flat compression spring contained in the captive recoil spring assembly by a polymer absorber bushing. Service life is still engineered to exceed 20,000 rounds.

The frame mounted control lever, a combination safety and decocking lever, has a slimline profile for compactness but is still quickly accessible, unlike the slide mounted safeties common on many semi-automatic pistols.

By using the same modular approach to the internal components found on large frame USPs, the control lever function of the USP Compact can be switched from the left to the right side of the pistol for left-handed shooters. Optional ambidextrous control levers are also available for all frame sizes of the USP. Simple to maintain, the USP Compact is a reliable, safe, accurate, and highly concealable pistol with the performance of a full size handgun.

UTL Mark II light output is rated at 115 Lumens, fifty times greater than a D cell flashlight.

Polygonal barrel made by cold-hammer forging ensures increased barrel life and accuracy on par with full size USP models.

The HK LEM (Law Enforcement Modification) trigger system has no control lever and an enhanced, smooth DAO trigger mode.

The frame mounted control lever, a combination safety and decocking lever, has a slimline profile for compactness but is still quickly accessible, unlike the slide mounted safeties common on many semi-automatic pistols. Control lever function for other variants can be switched to accommodate left-handed users or removed entirely for a smooth sided DAO model.

Highly contoured frame, slide, and operating controls reduce wear and tear on clothing and help speed holstering.

Grooved target trigger

USP40 COMPACT LEM .40 S&W
(Law Enforcement Modification double action only model) with 12-round metal magazine

USP357 COMPACT CALIBER .357 SIG
with 12-round metal magazine

Universal mounting grooves are molded in the polymer frame of the USP Compact. These grooves allow a variety of accessories to be mounted on the HK USP Compact without modification to the pistol.

Contact HK for a list of holsters manufactured for HK pistols.

Grip dimensions on USP Compacts are well-suited to shooters with small hands.

LAW ENFORCEMENT MODIFICATION (LEM) TRIGGER SYSTEM

Developed especially for a U.S. government agency, the Law Enforcement Modification (or LEM for short), is a unique trigger mechanism created specifically to improve the trigger performance and reduce the weight of the Double-Action Only (DAO) trigger pull in the HK USP, USP Compact, and P2000 series of pistols.

With this mechanism, HK pistols can be fired like a standard DAO semi-automatic pistol where every round is fired by simply pulling the trigger fully rearward with the hammer starting at the forward rest position. The design of the proprietary HK LEM system allows the weight of the DAO trigger pull to be reduced to a smooth and constant 7.5-8.5 pounds because the two-part hammer is precocked every time the slide moves rearward. Optional adjustment (by HK armorers) can bring the trigger pull into the 5.5 pound range.

The USP Compact uses metal magazines to keep grip size to a minimum. Magazines for the USP Compact have two interchangeable floor plates available, either extended magazine floor plates with a finger extension or flat floor plates for reduced size.

A feature on all USP, P2000, and Mark 23 models is the patented HK Lock-Out Safety Device. When engaged, it locks the handgun's action by blocking any movement of the hammer strut and hammer. The handgun is locked and cannot fire until unlocked.

HK USP Pistols

The HK USP (Universal Self-loading Pistol) is the first HK pistol designed especially for American shooters. Features favored by the U.S. military, law enforcement agencies, and civilian users provided the design criteria for the USP. Its controls are uniquely American, influenced by such famous designs as the Government Model 1911 pistol.

The control lever, a combination safety and/or decocking lever, is frame mounted and quickly accessible, unlike the slide mounted safeties common on many semi-automatic pistols.

Using a modified Browning-type action with a special patented recoil reduction system, the USP is built to take the punishment of powerful +P and +P+ loads. The recoil

Three-dot sights (optional tritium sights available)

Polygonal bore profile for increased velocity, easier cleaning, and longer barrel life

Patented recoil reduction system was tested and proven in the HK MK 23, MOD 0 semi-automatic pistol issued to the US Special Operations Command.

Universal mounting grooves for installing accessories

USP9 CALIBER 9MM
with 15-round polymer magazine

The ambidextrous magazine release lever is shielded by the trigger guard from inadvertent actuation. It can be easily operated using the thumb or index finger without adjusting the grip of the firing hand.

Stepped grip combined with the tapered magazine well, makes magazine changes fast and precise. The sides of the magazine well have finger recesses that also aid in magazine removal.

Extended floorplate magazine (Special order only) USP9 only includes standard flat magazine floorplate.

One-piece machined steel slide

USP45 CALIBER .45 ACP
with 12-round metal magazine
LIMITED AVAILABILITY
(Subject to Stock on Hand)

Single control lever function can be changed to opposite side for left hand users. The control lever allows the USP to be carried "cocked & locked" and has a positive stop, returning to the "fire" position after decocking. The slide can still be actuated when the control lever is placed in the "safe" position (where applicable). Also available with the HK LEM trigger system.

USP40 CALIBER .40 S&W
with 13-round polymer magazine

Reinforced polymer frame. HK pioneered the use of composite materials in production handguns more than twenty-five years ago with the development of the VP70Z and P9S pistols.

Optional remote pressure switch for HK UTL

Oversized trigger guard for use with gloves

The HK MKII UTL (Universal Tactical Light) is a compact, high intensity light that can be installed on the accessory grooves of all USPs in seconds without tools.

HK USPs are available in ten different firing configurations and three standard calibers. Other calibers available by special order.

*Law Enforcement Modification

reduction system reduces recoil effects on pistol components and also lowers the recoil forces felt by the shooter. The USP recoil reduction system is insensitive to ammunition types and requires no special adjustment or maintenance. It functions effectively in all USP models.

By using a modular approach to the internal components, the control lever function of the USP can be switched from the left to the right side of the pistol for left-handed shooters. The USP can also be converted

from one type of trigger firing mode to another. This includes combination double-action and single-action (DA/SA) modes and double action only (DA-Only) modes including the recently developed proprietary HK LEM (Law Enforcement Modification) enhanced trigger system.

The USP is available in both standard frame and compact models with ten trigger/firing mode configurations and four calibers—.45 ACP, .40 S&W, 9mm, and .357 SIG (special order on standard frame USP).

HK P7 Pistols

P7 pistols can be drawn, cocked, and fired accurately faster than any other pistol. The unique HK cocking lever allows the P7 to be carried safely with a round in the chamber, yet it is ready to fire by the intentional tightening of the fingers around the grip. Releasing the cocking lever decocks the P7 immediately and renders it completely safe. The cocking lever also doubles as a slide release lever.

The unique P7 gas system retards the movement of the recoiling slide during firing and

eliminates the need for a conventional locking mechanism.

A low profile slide contributes to the balanced center of gravity and overall compact size of the P7. Made of high grade steel, the low profile slide keeps the recoiling mass to a minimum.

Combined with the optimal grip angle of 110°, the result is an accurate, low recoil pistol; well suited for military and law enforcement users as well as personal protection and concealed carry.

Mark 23

LIMITED AVAILABILITY

(Subject to Stock on Hand)

The HK Mark 23 Caliber .45 ACP pistol gives shooters match grade accuracy equal to that of the finest custom made handguns—yet they exceed the most stringent operational requirements ever demanded of a combat handgun. The Mark 23 provides this accuracy without the need for hand-fitted parts common in custom-built match pistols costing thousands of dollars more.

One of the most thoroughly tested handguns in history, the MK23/Mark 23 project originated in 1991 when HK began development for the U.S. Special Operations Command. With deliveries beginning in 1996, the MK 23 became the first caliber .45 ACP pistol to enter U.S. military service since the venerable Government Model 1911A1.

USP Tactical

LIMITED AVAILABILITY

(Subject to Stock on Hand)

An enhanced version of the USP, the Tactical is designed for users who need the features found on the Mark 23, but in a smaller and more affordable pistol. The USP Tactical pistol approaches the precision found on the Mark 23 by adding an extended threaded barrel with a rubber O-ring, adjustable trigger stop, and adjustable target-type sights to the USP. Available in .45 ACP and .40 S&W.

The USP9 SD is essentially a 9mm USP Tactical but with a slightly different set of standard features.

The HK Mark 23 is a military and law enforcement model of the U.S. Government issue MK 23, MOD 0 Offensive Handgun and is available in limited numbers. Designated the "Mark 23", it is almost identical to the MK 23, MOD 0 pistol used by the Special Operations Command, right down to its threaded barrel. The principal differences are slide inscriptions (Mark 23 as opposed to MK 23) and a barrel manufactured to SAAMI headspace specifications.

The specialized USP models (USP Tactical, USP Expert, and USP Elite pistols) all use the same patented recoil reduction system found on the full frame USP and the Mark 23. When the pistol is fired, the impulse of the rearward traveling barrel and slide are effectively buffered, eliminating the direct transmission of recoil forces to the pistol's frame and the shooter's hand.

A threaded insert in the trigger guard is used to secure accessories to the pistol.

MARK 23 .45 ACP
with 12-round metal magazine
(MK23 USSOCOM Issue Pistol
NSN: 1005-01-426-8951)

Coarse reset left-hand threads resist damage and ensure suppressors remain tight during prolonged firing.

Threaded o-ring barrel for use with a sound suppressor (available from HK for agency purchase only).

Rear target sight features micrometer adjustment for windage and elevation. Fixed 3-dot or tritium sights available as an option.

Extractor doubles as a loaded chamber indicator.

USP45 TACTICAL .45 ACP
with 12-round metal magazine
(also available in .40 S&W with jet
funnel and 16-round magazine)

The USP9SD is fitted with click adjustable sights of sufficient height to see over the mounted optional sound suppressor. The barrel is threaded left hand, does not have an O-ring and does not require a thread cap. An optional Bruegger & Thomet (B&T) "IMPULS IIA" stainless steel screw-on sound suppressor is matched to the pistol via the last 3 digits of the weapons serial number when they are assembled together at the factory. The B&T sound suppressor was developed specifically for use on the HK USP9 pistol and has its own separate serial number. It is possible to reduce the sound signature by an additional 1 to 3 dBs over that of the dry sound suppressor by adding 5 CCs of water to the sound suppressor baffles. It will also help reduce the first round pop often experienced with a dry sound suppressor. This water will help cool the hot propellant gases and will last for 20 shots or 12-24 hours.

USP9 SD 9MM
with screw-on sound suppressor

The frame mounted MK 23 decocking lever is separate from the ambidextrous safety lever. It allows the hammer to be lowered quietly and safely from the single action position. When the hammer is down, the ambidextrous frame mounted safety lever is locked in the fire position so that the pistol is always ready for double action operation. When the hammer is "cocked and locked" in single action mode with the safety lever on "safe", the decocker is blocked so that the pistol is always ready for single action operation.

Even with the safety lever engaged, the slide can still be manipulated to load and clear the pistol.

The extended slide release lever and the ambidextrous magazine release are easily actuated without adjustment of the firing grip using the firing hand thumb or index finger.

Reinforced polymer frame

Military and law enforcement 12-round steel magazine

Target sights with micrometer adjustment for windage and elevation

Ambidextrous control levers on both sides of the frame

Extractor doubles as a loaded chamber indicator

Match trigger parts and adjustable trigger stop

Hand fitted extended slide (9.45 inches) and polygonal barrel (6.20 inches) with O-ring

"Wet" technology screw-on sound suppressor provides maximum sound reduction and can be "indexed" to converge the point-of-aim and the point-of-impact on the target.

USP45 ELITE .45 ACP
with 12-round metal magazine

USP Expert

LIMITED AVAILABILITY
(Subject to Stock on Hand)

Using the common lineage of the USP and developed in conjunction with internationally renowned pistol shooters, the USP Expert achieves the highest levels of accuracy by combining features of the USP Tactical and Mark 23 pistols with a new longer slide design. The result is a USP well suited to a wide variety of tactical shooting scenarios. Available in .45 ACP, .40 S&W, and 9mm.

Universal mounting grooves for installing accessories like the HK UTL MK II weapons light or a laser aimer

Rear target sight features micrometer adjustment for windage and elevation.

USP40 EXPERT .40 S&W
with 16-round polymer magazine

A near perfect .40 S&W tactical pistol, the USP40 Expert has a special jet funnel magazine well extension to speed reloading and uses an extended 16-round polymer magazine.

USP Elite

LIMITED AVAILABILITY
(Subject to Stock on Hand)

A long slide model of the USP, the USP Elite combines features found on standard sized USP and specialized models of the USP such as the USP Expert and USP Tactical. Most noteworthy is the 6.2 inch barrel, making the USP Elite the longest on all USP models—and one of the most accurate. The added length of the elongated target slide also aids the balance of the USP Elite. Available in .45 ACP and 9mm.

HK MP5 Submachine Guns

Heckler & Koch MP5 submachine guns employ the same delayed blowback operated roller-locked bolt system found in the famous HK G3 Automatic Rifle. All the elements of HK excellence; reliability, ease of handling, simple maintenance, and safety are highlighted on the MP5. Firing from the closed-bolt position during all modes of fire makes MP5 submachine guns extremely accurate and controllable.

Used by military and law enforcement units in more than fifty nations, the MP5 is firmly established as the world's preeminent submachine gun. Over 120 variants of the HK MP5 submachine gun are available to address the widest range of tactical requirements.

A selection of optional trigger groups allow for single fire only, full automatic, 2-round, and 3-round burst options. The weapon's unique modular design and a variety of optional buttstocks, forearms, sight mounts, and other accessories gives the MP5 extraordinary flexibility to meet most any mission requirement.

MP5K-PDW 9MM with Navy trigger group

The MP5K-PDW (Personal Defense Weapon) is a compact submachine gun designed for vehicle operators, air crew members, security details, and others who require a small, but powerful weapon. While comparable in performance to full size MP5s, the size and weight of the MP5K-PDW make this weapon the ideal choice where a rifle or full-sized submachine gun is unmanageable and a handgun is a poor compromise.

MP5SFA2 9MM with SF trigger group

The MP5SF (single fire) carbine is a semi-automatic only variant of the MP5 fitted with a trigger group that prevents full automatic firing. Comes with a detachable flash hider as a standard feature. (Not available for individual purchase)

MP5 Trigger Groups

SEF Trigger Group	Numerical Trigger Group	SF (Single Fire) Trigger Group	0-1-2 Trigger Group	0-1-3 Trigger Group	Navy Trigger Group	2-Round Burst Trigger Group
S safe E single fire (semi-automatic) F fully automatic	S safe 1 single fire (semi-automatic) 20/25 fully automatic	semi-automatic safe	two-round burst semi-automatic safe	three-round bursts semi-automatic safe	fully automatic semi-automatic safe	fully automatic two-round burst semi-automatic safe

SEF and Numerical trigger groups have a single safety/selector lever on the left side, all other groups have safety/selector levers on both sides.

Accessory claw-lock scope mount and optional reflex sight. HK scope mounts attach to submachine guns without tools at special points that ensure 100% return to zero. HK scope mounts do not interfere with the use of the weapon's iron sights.

New MP5 Universal Retractable Buttstock in extended position. MP5s can be fitted with a variety of buttstock options including receiver caps, retractable, fixed, and folding buttstocks. The Universal MP5 Retractable Buttstock has extended forks and dual rear sling attachment points.

Dual front sling attachment points

Optional tactical forearm light can be mounted on most HK submachine guns and rifles.

MP5A3 (F MODEL) 9MM
shown with optional
0-1-2 trigger group

0-1-2 Trigger Group includes "automatic double-tap" 2-round burst capability

Magazine clamp holds additional magazine

All MP5 submachine guns use a free floating, cold-hammer forged barrel and fire from the highly accurate closed-bolt position.

Low-profile sight mount with optional holographic sight

Optional wet technology sound suppressor; by adding 5 cc of water to this stainless steel suppressor, the weapon's report is reduced an additional 3-5 dB. Wet technology sound suppressors can also be fired full of water without damage.

Optional Modular Rail System forearm with detachable vertical foregrip accepts a vast array of rail mounted accessories including those of the U.S. SOPMOD kit.

Optional extended safety/selector lever

MP5 9MM
with folding stock
and 2-round burst
trigger group

Detachable flash hider

Side folding buttstock (weapon can be fired with stock folded).

30-round
9mm magazine

The MP5K is the ultimate close quarters weapon. At 4.4 pounds and less than 13 inches long, the MP5K is easily concealed and carried. All MP5Ks can be fitted with an optional folding buttstock and some models can be fired from inside a specially designed briefcase (below).

Ideal as a squad car carbine to supplement or replace the 12 gauge shotgun, especially for small stature officers. Less recoil, greater range, and more ammunition capacity than a shotgun.

Compact 15-round
9mm magazine
(interchangeable with
30-round magazines)

Dual front sling attachment points

Optional tactical forearm light can be mounted on most HK submachine guns and rifles.

New MP5 Universal Retractable Buttstock in extended position. MP5s can be fitted with a variety of buttstock options including receiver caps, retractable, fixed, and folding buttstocks. The Universal MP5 Retractable Buttstock has extended forks and dual rear sling attachment points.

MP5A3 (F MODEL) 9MM
shown with optional
0-1-2 trigger group

0-1-2 Trigger Group includes "automatic double-tap" 2-round burst capability

Magazine clamp holds additional magazine

All MP5 submachine guns use a free floating, cold-hammer forged barrel and fire from the highly accurate closed-bolt position.

Low-profile sight mount with optional holographic sight

Optional wet technology sound suppressor; by adding 5 cc of water to this stainless steel suppressor, the weapon's report is reduced an additional 3-5 dB. Wet technology sound suppressors can also be fired full of water without damage.

Optional Modular Rail System forearm with detachable vertical foregrip accepts a vast array of rail mounted accessories including those of the U.S. SOPMOD kit.

Optional extended safety/selector lever

MP5 9MM
with folding stock
and 2-round burst
trigger group

Detachable flash hider

Side folding buttstock (weapon can be fired with stock folded).

30-round
9mm magazine

The MP5K is the ultimate close quarters weapon. At 4.4 pounds and less than 13 inches long, the MP5K is easily concealed and carried. All MP5Ks can be fitted with an optional folding buttstock and some models can be fired from inside a specially designed briefcase (below).

Ideal as a squad car carbine to supplement or replace the 12 gauge shotgun, especially for small stature officers. Less recoil, greater range, and more ammunition capacity than a shotgun.

3-Round Burst Trigger Group

HK MP5 Submachine Guns

Developed especially for one of America's most elite special operations units, the MP5 "Navy" model comes standard with an ambidextrous trigger group and threaded barrel. Operationally tested and proven, this configuration represents the essence of the modern submachine gun.

For specialized applications requiring fully realized sound and flash suppression, several MP5SD models are available. The removable sound suppressor is integrated into the weapon's design and conforms to the normal length and profile of a conventional, unsuppressed submachine gun.

MP5-N 9MM
with "Navy" trigger group.
The Navy model was developed for
the elite U.S. Navy SEAL Teams.
(NSN:1005-01-360-7146)

MP5 Navy models have threaded barrels and can be used with or without an optional wet technology stainless steel sound suppressor.

Operating controls like those of other HK weapons simplifies training.

Detachable hooded front sight post. Optional tritium sights are also available.

Optional aluminum Quick Connect sound suppressor mounts on the UMP's hammer forged barrel in seconds

"Navy" trigger groups and all HK trigger groups with "Pictogram" markings are completely ambidextrous.

Paddle and button magazine release common on most HK long guns

Flip-up rear sight with peep and Patridge apertures. Adjustable for windage and elevation with an Allen wrench.

Closed bolt operation ensures rifle-like accuracy at extended ranges. Bolt incorporates forward assist notch and firing pin safety.

Optional vertical foregrip mounted on accessory Picatinny rail

Eight molded-in hard points for accessory rail attachment on the upper receiver

Study folding stock with rubber cheekpiece and buttpad. The UMP can be fired with the stock folded.

Empty weight of only 4.6 pounds

Quick Connect muzzle for fast accessory attachment without the needs for muzzle threads.

Flared magazine well for speedy magazine changes

25-round magazine

Oversized trigger guard for easy operation while wearing gloves.

Textured pistol grip with internal storage space

Tough, lightweight, 30-round polymer magazine with ammunition viewing strips.

UMP40 .40 S&W
with "Navy" trigger group

Ammunition Performance Comparison Table			
	Cartridge Specifications	Velocity (FPS) muzzle/100 meters	Muzzle Energy (Foot Pounds) muzzle/100 meters

Optional front and rear tritium sights available

Ported barrel lowers velocity and sound signature of departing projectiles

"SEF" trigger group with safe (S), single fire (E), and full automatic (F)

The MP5SD uses an integral aluminum or optional wet technology stainless steel sound suppressor. Due to its ported barrel, it **does not** require use of subsonic ammunition for effective sound reduction like most conventional sound suppressed submachine guns.

Optional Picatinny rail allows a wide variety of scopes and aiming devices to be easily mounted

Bolt catch holds bolt rearward when last round is fired

MP5SD3 9MM
with integral aluminum sound suppressor and standard "SEF" trigger group (NSN: 1005-01-144-3036)

Polymer construction reduces weight and eliminates surface corrosion.

The 9mm model of the UMP, the compact, lightweight (4½ pounds) UMP9 submachine gun includes many of the same characteristics found on the UMP40 and UMP45 models. It utilizes a 30-round curved polymer magazine, folding buttstock, bolt catch, and fully ambidextrous controls as well as a user replaceable barrel.

Extended ambidextrous safety/selector lever combined with Pictogram firing mode markings

Oversized ambidextrous magazine release. Operating controls similar to those of other HK weapons.

UMP45 .45 ACP

UMP Submachine Guns

The renowned hard-hitting performance of the classic .45 ACP cartridge and the more recently developed .40 S&W cartridge is now available in a truly modern submachine gun from HK, the UMP. Available as a select-fire submachine gun or semi-automatic only carbine, the HK Universal Machine Pistol was designed especially for American law enforcement and military organizations.

The UMP is a cost-effective, state-of-the-art weapon that offers the user the advantages of light weight, low initial purchase and maintenance costs, uncompromising reliability, modularity for accessory attachment, and precision accuracy with low felt recoil. Also available in 9mm.

UMP Accessories

MP7A1 ^{NEW} Personal Defense Weapon

The HK MP7A1 and the 4.6 x 30mm family of high performance ammunition were developed by Heckler & Koch to provide the penetration and lethality approaching that of an assault rifle in a package small and portable enough to be carried like a handgun at all times for 24-hour personal defense. Adopted and fielded by the German special operations unit "KSK" in 2002, the MP7 is now available (MP7A1 model) to U.S. military and law enforcement organizations.

Current pistol-caliber handguns and rifles are incapable of defeating (penetrating) modern body armor, in particular that of the former Soviet Bloc special forces, now the standard NATO test target (CRISAT). These vests have found their way into terrorist and criminal hands and make conventional pistol-caliber weapons ineffective for defensive or offensive engagements. In response to the NATO PDW requirement document D29, Heckler & Koch has developed a Personal Defense Weapon system that will defeat the CRISAT vest, comprised of 1.6mm titanium plates and 20 layers of Kevlar, out to 200 meters.

It handles like a pistol yet allows targets to be engaged like a rifle. With its 7-inch barrel, the HK MP7A1 is capable of firing 10-shot semi-automatic groups at 45 meters of less than 2 inches. Unlike competing designs, the conventional and fully ambidextrous design of the HK MP7A1 ensures immediate acceptance by all users.

The gas-operated MP7A1 fires from the closed position, using a rotary locking bolt system similar to that of the HK G36 assault rifle to contain the powerful 4.6mm cartridge. The MP7A1 is manufactured predominantly of carbon fiber reinforced polymer with embedded metal components where needed. The weapon can be field stripped in seconds without tools and requires little cleaning due to the unique gas system employed in the design.

A personal defense weapon is only as good as the operators' ability to effectively engage targets under high stress conditions. With this goal in mind, HK designed the cartridge to defeat today's modern threats; then designed the weapon system around the cartridge. The lethal 4.6 x 30mm cartridge produces minimal felt recoil (50% of a 9mm NATO round) to assure that multiple hits are easily obtainable in all modes of fire—incapacitating the target through penetration and permanent tissue destruction.

The MP7A1 is fitted with a removable full length MIL-STD-1913 rail on the top of the receiver for mounting all manner of optional targeting devices. Optional forearm rails are also available. Standard folding mechanical peep sights can be fitted to the top rail or an optional 24-hour reflex sight can be attached in seconds without tools. The reflex sight provides a single red aiming dot for 24-hour use when the weapon is fired from the shoulder or at arms length like a handgun.

Special carrying devices are available for overt and discreet carry of the MP7A1. Due to its lightweight, small size and minimal width the MP7A1 is ideal for VIP protection details while concealed and perfect for drivers, pilots, guards and support personnel who require hands free carry of their defensive weapon while performing other tasks.

The HK MP7A1 provides the combination of concealability of a handgun with the range, penetration, and lethality approaching that of a select-fire assault rifle. The users desire to have a modern and effective personal weapon that can be worn at all times like a handgun has been realized in the Heckler & Koch MP7A1 PDW.

7-inch cold-hammer forged barrel with right hand twist rifling (1 turn in 6.3 inches) shown with removable flash hider. Quick detachable sound suppressor attaches directly to the flash hider in seconds with no change in zero.

Accessory rails for mounting additional accessories

The folding vertical foregrip allows the MP7A1 to be fired with excellent controllability

The gas-operated MP7A1 fires from the closed position, using a rotary locking bolt system similar to that of the HK G36 assault rifle to contain the powerful 4.6mm cartridge.

Due to its small size and weight, the MP7A1 can be carried at all times like a handgun yet it is immediately ready with rifle-like performance when needed.

With the stock retracted, the length of the MP7A1 is less than 15 inches

MP7A1 BALLISTICS SUMMARY

NEW

M16-style cocking handle

MP7A1 4.6 X 30MM PERSONAL DEFENSE WEAPON with reflex sight and buttstock and vertical foregrip extended

All operating controls, including the safety/selector lever, magazine release, bolt catch/release, and cocking handle are fully ambidextrous.

The MP7A1 is small and lightweight (3.8 pounds with 20 rounds loaded) and can be fired with one or two hands or from the shoulder using the sturdy retractable buttstock.

Removable full length MIL-STD-1913 rail on the top of the receiver for mounting a wide variety of sighting systems and accessories

Standard folding mechanical sights can be fitted to the top rail

With its flash hider removed, the MP7A1's length is reduced to that of a large handgun

Handguard's hook design keeps finger away from the muzzle

MP7A1 4.6 X 30MM PERSONAL DEFENSE WEAPON (PDW) without flash hider and with buttstock and vertical foregrip retracted

20-round magazines fit flush into the centrally mounted pistol grip. Optional extended 40-round magazines are also available.

Target Penetration (200 meters)

Size Comparison

MP7A1 with accessories

Penetration

3 rounds fired at 200 meters, 100% penetration using combat steel cartridge

MP7A1 SUPPRESSOR EFFECTIVENESS

WEAPON TYPE	SOUND SUPPRESSOR	AMMUNITION TYPE	MUZZLE VELOCITY	NOISE LEVEL	NOISE REDUCTION
MP7A1	without suppressor	26.2 grain Combat Steel Round (Supersonic)	2362 fps	141dBA	
MP7A1	with suppressor	26.2 grain Combat Steel Round (Supersonic)	2448 fps	110 dBA	Reduction 31 dBA
MP7A1	with suppressor	77 grain Subsonic Round	1069 fps	103 dBA	Reduction 38 dBA
MP5 SD	with suppressor	124 grain Ball Round	1017 fps	115 dBA	

HK designed the MP7 around the cartridge. The lethal 4.6 x 30mm cartridge produces minimal felt recoil (50% of a 9mm NATO round). A 4.6mm steel ball round will penetrate a CRISAT target (the equivalent of a Soviet special forces bullet-proof vest) at 200 meters. This same cartridge will penetrate two CRISAT targets at 50 meters and passes easily through automobile windshields with minimal deflection. For special missions, HK has developed a wide selection of subsonic and reduced penetration cartridges as well as heavy projectiles (up to 46 grains), blank, tracer, frangible and low cost training rounds.

HK G36 Weapon System

Developed by HK in the mid 1990s, the G36 is a true modular weapon system in caliber 5.56x45mm NATO (.223 Remington). Constructed almost entirely of a tough, carbon fiber reinforced polymer material and using a simple, clean shooting, self-regulating gas system, the G36 provides the user with a lightweight weapon that delivers high performance with extremely low maintenance. The barrel of the G36 can be exchanged by unit armorers to create a rifle, short carbine, carbine, or light support variant using the same common receiver. Exhaustively tested and currently fielded with the German and Spanish Armed Forces (including the new NATO Rapid Reaction Force), the G36 is now available to U.S. law enforcement and military customers.

G36 barrels can be easily removed by the unit armorer with a special torque wrench.

G36 5.56MM RIFLE
with 18.9 inch barrel

Chrome-plated, cold hammer forged 18.9 inch barrel with 1 in 7 inch twist rifling. Optional 15.4 inch "CQB" barrel with 1 in 9 inch twist available.

The low mass of the bolt and ergonomic in-line relationship of the barrel and the buttstock translate to a highly-controllable weapon when fired in the fully automatic mode of fire.

Picatinny rail with adjustable iron sights

The G36 gas system does not direct fouling back into the weapon's interior like conventional gas operated rifles. This insures reliable operation even after firing more than 15,000 rounds without cleaning. The polymer components can easily be cleaned with water-based cleaning solutions, or even water.

Special 4-prong flash hider virtually eliminates muzzle flash.

Integral cartridge case deflector doubles as a buttstock retainer when the stock is folded.

G36K 5.56MM CARBINE
with 12.5 inch barrel, iron sights, and buttstock folded

Ambidextrous bolt catch button. The bolt catch holds the bolt to rear on the last round fired and can be disabled by the shooter without tools, allowing the bolt to close when the magazine is fired empty.

Tough 30-round translucent polymer magazines lock together without magazine clamp. They are 30% lighter than metal magazines and are corrosion proof.

G36 Accessories

Accessories include a dual combat sight system, passive night vision module, quick-detachable tactical light and laser, folding bipod, and blank firing attachments. Other accessories are under development.

**G36C 5.56MM
COMPACT CARBINE**
with 9 inch barrel

The G36C Compact Carbine is actually shorter than an MP5 with the buttstock folded

Rifles and Carbines

Heckler & Koch rifles and carbines are recognized as the most technologically and tactically advanced weapons in the world. Reliability, modular construction, a true "system" approach, and a complete line of shoulder arms and accessories make HK the world leader in tactical armament.

Using the robust and reliable delayed blowback roller-locked bolt operating system first developed by HK engineers for the G3 automatic rifle, Heckler & Koch has created a variety of weapons designed to meet any tactical need—whether long distance marksmanship (PSG1 and MSG90A1 in 7.62mm NATO) or close quarter battle (HK53 in 5.56mm NATO).

Common throughout each weapon group is the ability to use many interchangeable assembly groups and components. This provides the ability to train personnel within one weapon group and have them competent with the entire weapon system.

HK M4/M16 HIGH-RELIABILITY MAGAZINE

A weapon is only as reliable as its magazine. Designed by HK to provide an uncompromising reliable feeding source for

existing M4 and M16 systems the HK High Reliability Magazine has been combat proven by various U.S. Special Operations and foreign military units worldwide. Its superiority has been evidenced throughout extensive testing in arctic, desert, jungle, and maritime environments. It features a well executed design, select materials, special anti-friction surface finish, advanced spring material, attention to production tolerances, and a heat-treated steel magazine housing and follower. For use in extreme environments HK now offers a special maritime coating which easily surpasses

the US MIL-STD-810 E salt fog test. During this test, the HK High Reliability Magazines were exposed to a 100 hours salt fog test and then stored three days at ambient temperature. After this test procedure each magazine was fully loaded with 30 rounds and fired twice with no problems experienced.

In U.S. military testing the HK M4/M16 magazine improved feeding reliability of the M4 carbine by 30-50% overall.

Only two inches longer than an MP5, the HK53 offers the compact size and handiness of a submachine gun combined with the increased range and hard-hitting firepower of a high velocity rifle cartridge.

MSG90A1 7.62MM SNIPER RIFLE

The MSG90A1 has many of the same features found on the PSG1, but weighs only 14 pounds. Accuracy is sub-MOA with match ammunition.

Special 4-prong flash hider virtually eliminates muzzle flash

Optional ambidextrous 3-round burst trigger group

30-round steel magazine

Retractable buttstock

The PSG1, HK's preeminent precision marksman's rifle, is designed to deliver surgically accurate multiple shots to distant targets.

HK53A3 5.56MM COMPACT CARBINE
with 8.31 inch barrel and 3-round burst trigger group

PSG1 7.62MM SNIPER RIFLE

Cold-hammer forged barrel ensures unmatched accuracy and service life

Heavyweight polygonal barrel, free-floating and cold-hammer forged for accuracy and long life (15,000 rounds).

Adjustable precision tripod included (left)

5-round magazine (also accepts standard 20-round magazines and 50-round drum)

Optional 10X Hensoldt telescopic sight on a quick detachable scope mounting system ensures 100% zero retention even after repeated dismounting

Adjustable iron sights are standard on the MSG90A1

Anschutz T-way for accessory attachment

20-round magazine (also accepts 5-round magazines and 50-round drum)

Extended ambidextrous safety/selector lever

PSG1 trigger has a crisp three pound trigger pull and adjustable trigger shoe

Buttstock with adjustable length butt plate and vertically adjustable cheekpiece.

HK Special Application Products

Critical tactical situations call for specialized products designed to meet unique demands. HK's extensive line of special purpose products include shotguns, grenade launchers, light and general purpose machine guns, and the Grenade Machine Gun.

HK21E 7.62MM GENERAL PURPOSE MACHINE GUN

(Limited Availability Special Order Only) The 7.62mm HK21E and the 5.56mm HK23E machine guns use the same reliable operating principle as the HK G3 rifle. The high 800 rpm cyclic rate of fire ensures more rounds on target per target exposure.

Semi-automatic sniper rifle-like accuracy when needed from a belt-fed machine gun due to its heavy free floating barrel

Quick change barrel. Hot barrels can be changed in seconds without the need of a protective glove.

Receiver engineered for a minimum 60,000 round service life

Adjustable folding bipod allows traverse of 60 degrees

Optional "9 and 12 o'clock" MIL-STD-1913 rails available for accessory mounting

AG-C/EGLM 40MM GRENADE LAUNCHER

(shown with detachable buttstock)

Folding mechanical sight is adjustable for windage and elevation

Sturdy detachable, retractable stock for use as stand alone grenade launcher

Ambidextrous controls

Spring actuated side loading breech provides for fast and easy loading.

NEW

HK69A1 40MM GRENADE LAUNCHER

Lightweight at only 5.8 pounds, the HK69A1 is designed to fire a variety of low velocity 40mm ammunition (including CS, HE, AP, nonlethal, and flares) to ranges of 400 meters with a degree of accuracy not available from competing designs.

Rifled steel barrel for increased range, accuracy, and durability

Ladder sight for long range targets (100-400 meters)

Precision flip-up dual aperture short range sight (50 and 100 meters)

Break-open action and separate manual hammer allows the HK69A1 to be loaded and unloaded without being cocked

Ambidextrous safety lever

Retractable stock allows the HK69A1 to be fired as a pistol or from the shoulder

Quick detachable scope mounting platforms

Adjustable 1,100 meter sight

Belt or optional box magazine and drum feed mechanism

Standard ambidextrous 3-round burst trigger group

Mechanical recoil buffer system incorporated in buttstock

Mechanical grenade launcher tangent sight mounts on both the right or left side of the weapon. Optional glass block sight also available.

Side-loading breech enables the operator to view the loading and unloading process without rolling the weapon over, helps to ensure positive and speedy reloads, and allows the use of extended length cartridges.

AG-C 40MM GRENADE LAUNCHER (shown mounted on M4 carbine)

The AG-C fires all low velocity 40x46mm ammunition

Rifled aluminum barrel for increased range, accuracy, and durability

Attaches to M16 rifle or M4 carbine with rail system in seconds without modification.

Ambidextrous breech release button

Double action only trigger

Ambidextrous safety lever

NEW

GMG

Grenade Machine Gun

Used in combat operations in both Afghanistan and Iraq by select U.S. Special Operations units, the HK Grenade Machine Gun performed superbly and is slated to replace the current issue automatic grenade launchers in many of those units. The HK GMG is available from series production at a unit cost well below the purchase cost of competing systems.

Its advanced features, excellent accuracy, operator convertible feed direction and removable barrel, night fighting capability with NVGs and unmatched operator safety features are all unique hallmarks of the HK GMG.

The HK GMG uses an aluminum receiver for reduced weight and manufacturing costs. Other features include a fluted chamber for equal pressure on cartridge case and positive extraction and ejection, advanced primer ignition, and a barrel that is easily removable for field stripping without the use of tools. This is also an advantage in the event that an HE projectile becomes lodged in the bore.

The bolt reciprocates on a massive guide rod and is stabilized by two steel rails, all of which are bolted to the receiver, eliminating the need for welding in the receiver.

The HK GMG upper mount (gun cradle) readily mounts to standard U.S. tripods, various vehicle mounts, or the lightweight, adjustable HK aluminum tripod. The HK tripod provides low-to-high height position settings as well as provisions for the use of a ballast sack to reduce tripod movement during firing from the high standing position, as when firing from behind cover such as a wall or berm.

The upper mount also provides a wider, more stable set of control grips with ambidextrous firing levers and an adjustable shoulder support. This enables the operator to quickly index and accurately engage multiple or moving targets during free gun firing.

Clearing the gun simply consists of lifting the feed tray cover and removing the belt. The position of the ambidextrous charging handle allows the shooter to cock and clear the gun without reaching near the ammunition belt and feed way.

Both the gun and tripod can be easily transported in a "backpack" configuration, by a two-man team.

The HK GMG is also perfectly suited to vehicle turret and helicopter mounting. It is both accurate and easy to use, with an extremely smooth feed cycle and impressive safety features. It is flexible, convertible to right or left feeding, and simple to maintain—with no tools being required for stripping or reassembly. All in all, a complete solution to the demanding requirements of effective ground fire support.

The GMG's muzzle velocity is 790 feet/second (241 meter/second) with a maximum range of 7218 feet (2200 meters) at an approximate rate of fire of 350 rounds/minute.

The adjustable stabilizing shoulder rod is mounted on the receiver for additional controllability during free gun firing.

A robust, recoil operated inertia bolt with advanced primer ignition, firing from an open bolt position, directly chambers the cartridges out of the belt. The bolt fires all types of available 40 x 53mm grenades in either semi or fully automatic firing modes.

The modular trigger group is easily replaced with a solenoid for remote-control fire, when vehicle or helicopter mounted.

A lightweight tripod is available which permits a wide range of firing positions and heights, maximizing the gun's tactical flexibility. The GMG may also be fitted to the U.S. M3 tripod.

Upper mount (gun cradle)

The upper mount buffers the recoil and includes handles, a secondary trigger lever, a shoulder rod, the attachment points for the sighting system and the mounting for the ammunition box.

Quick detachable glass block reflex sight for rapid aiming and target engagement, for ranges up to 1,500 meters is available. Night fighting capability is possible using the reflex sight with NVGs. The GMG also has a folding mechanical 600 meter or 1500 meter sight.

The receiver uses a solid extruded aluminum design, combining light weight with strength.

Weapon weighs 63 pounds (29 kg)

The barrel can be removed by the operator in seconds without tools.

Weapon weighs 63 pounds (29 kg)

Under development for the HK GMG is a bolt-on air-bursting ammunition system with multi-function programmable fuzed ammunition and common compatible buffered upper mount for the HK GMG and US M2 BMG that will provide quick slew traverse and elevation capability without the need for a conventional T&E mechanism.

GRENADE MACHINE GUN (GMG) 40 X 53MM

Linked 40 x 53mm ammunition is fed from a NATO PA 120 ammunition box with a capacity of 32 rounds. The GMG ammunition box weighs 44 pounds (20 kg) with 32 rounds of belted ammunition.

Tripod weighs 24 pounds (10.9 kg)

The ammunition box holder attaches directly to the the HK upper mount and enables removal of the GMG from the mount while the box holder remains attached. It can easily be changed from the right side to the left side of the weapon.

FIVE SAFETY FEATURES

SAFETY/FIRE SELECTOR LEVER

The safety/fire selector lever features the settings safe, semi-automatic fire, and fully automatic. Setting the selector at "safe" blocks the trigger and locks the bolt in its cocked position.

LOADING SAFETY

Opening the feed cover prevents the bolt from traveling forward endangering the operator's hands.

BOLT LOCK

This locks the bolt in position and permits the operator to clear the GMG safely.

FIRING PIN SAFETY

This independent safety system ensures that the firing pin cannot reach the primer until the cartridge is fully supported in the chamber

COCKING SAFETY

Where the bolt is not pulled back completely, accidental firing is prevented by an integral, automatic mechanism which stops the bolt from traveling forward.

Product not available for Law Enforcement

Feed System

Driven by the bolt, the system feeds and guides the linked cartridges in two smooth movements during the forward and backward movement of the bolt. The feed direction can be readily reconfigured from right to left by the operator in the field in minutes, without the use of tools.

Accessories

An extensive line of accessories is available for Heckler & Koch weapons. Designed and manufactured to the same exacting standards, HK accessories add functionality and highlight the true systems approach used in developing these firearms. A variety of instructional aids including wall charts and posters are also available.

MODES OF FIRE

M – manually operated
S – semi-automatic
2 – 2 round burst
3 – 3 round burst
F – fully automatic

SIGHTS

O – optical sight,
H – Hensoldt scope
D – diopter/rotary
X – magnification
DS – dual sighting system
FP – folding peep
M – mechanical

BUTTSTOCK CONFIGURATIONS

RC – receiver cap
FS – fixed stock
RS – retractable stock
PG – pistol grip stock
ASB – adjustable sniper buttstock
FOLD – folding

Specifications and model availability subject to change without notice.

HECKLER & KOCH INC. LAW ENFORCEMENT

Heckler & Koch Inc. products meet the most demanding expectations of Security Forces, Police and Special Tactical Units, as well as Homeland Security. Our customers can be sure of:

- Uncompromising standards of performance and safety, resulting from intelligent design, integrated safety, use of state-of-the-art materials and manufacturing technologies
- Total product reliability even under the worst climate conditions
- High tolerance level for a large variety of ammunition

LAW ENFORCEMENT SALES

State and local agencies, please contact HK Law Enforcement Sales Department directly at (703) 450-1900 or visit www.hk-usa.com for a list of authorized HK Law Enforcement dealers and distributors.

For Individual Officer sales, visit our website to find a dealer near you.

HK WARRANTY

Firearms purchased by law enforcement agencies are covered by a three year Limited Warranty against material defects and workmanship.

FIREARMS SAFETY

Read and follow all safety information in the operators manuals. Store all firearms in a safe and secure location. Keep firearms away from children. Always be a safe shooter.
