

## FABARM Gold Lion Mark III Shotgun

**Gold Lion Mark III Semi-automatic Shotgun  
with 28-inch barrel**

A product-improved version of the respected HK FABARM Gold Lion semi-automatic shotguns, the new Mark III delivers an unmatched combination of reliability, performance, and low recoil.

Styled for modern tastes, the Gold Lion Mark III features an enhanced walnut stock and forearm matched to a lightweight receiver with classic scroll engraving and gold inlay details.

The Gold Lion Mark III comes with a complete set of five chokes, sling swivel posts, shim kit for adjusting the stock drop, and a durable hardshell plastic transport case.

Like previous Gold Lion models, the Mark III uses the unique FABARM TriBore™ Barrel

### MARK III SPECIFICATIONS

<b>Stock</b>	Premium walnut
<b>Length of Pull</b>	14.58 inches
<b>Drop at Heel</b>	1.58 inches
<b>Drop at Comb</b>	2.44 inches

System for reduced recoil, increased velocity, and excellent shot patterning.

Using the renowned FABARM gas system, a design recognized for its simplicity and ruggedness, enables the Mark III to function reliably with all standard 12 gauge shells—whether they're light 2¾-inch target loads or powerful 3-inch magnums.

The Mark III, like all other FABARM semi-automatic shotguns has no action parts contained in the buttstock that change the center of gravity when the gun is fired. The recoil spring surrounds the magazine tube and works in the same axis and parallel to the barrel. This means the Gold Lion Mark III semi-automatic stays balanced—and stays on target when firing. Additional features include:

- chrome lined Tribore™ barrel
- free carrier allows a shell in the chamber to be replaced without emptying the magazine
- receiver milled from a solid block of light weight Ergal 55 alloy
- chrome plated gas system
- mid rib bead
- fixed ejector
- anatomical "palm swell" pistol grip
- lifetime warranty

## FABARM H368 "Composite" Shotguns

Rugged and durable polymer stocks added to a no-nonsense version of the HK FABARM auto-loader make the H368 series the ultimate tough duty hunting and utility shotguns.

The special polymer used in the stocks is "composited" from two synthetic materials—an outer "soft-touch" coating for a more positive grip and an internal hard polymer for strength and stability.

Like all FABARM auto-loading shotguns, the H368 series delivers unmatched reliability, performance, and low recoil. Adding a rubber buffer to the proven gas operating system further tames the recoil and decreases the battering stress caused by the powerful loads popular with shotgun hunters.

And with the improved, Zirconium-coated gas system it is now possible to add a magazine extension for a 7+1 shell capacity.

The attention to quality, absent in most factory assembled utility shotguns is apparent in the H368 series. H368s use the same deep

**FABARM H368 Composite is available with a 28-inch barrel (top)  
and as a left hand model (bottom)**

drilled barrel making techniques other companies reserve only for their premium over and under shotguns.

And for the first time a FABARM semi-automatic is available as a left hander. Other features of the the H368 series:

- TriBore™ chrome lined barrel
- reliable function with standard 12 gauge shells—from light 2¾ to 3 inch magnum
- free carrier
- milled, lightweight alloy receiver
- shim kit for stock drop adjustment
- mid rib bead
- lifetime warranty
