**LIMITED AVAILABILITY**  
**Only 1,000 being imported**  
**into the USA**

A recent addition to the Heckler & Koch handgun line, the P2000 incorporates features of the successful HK USP Compact pistol with the latest innovations of HK engineers. Designed especially for European police agencies, the P2000 uses the trigger system introduced in 2001 on the USP Compact "Law Enforcement Modification" model.

This unique pre-cocked hammer system combines the advantages of a cocked striker component (constant level of trigger pull and short trigger travel from first to last round fired) with the a double action hammer system.

HK P2000 9mm GPM  
(right view)

This ensures an extremely safe pistol with regard to unintended firing and, in case of failure to ignite, the possibility of a second or third trigger pull without the need of first pulling the slide back to re-cock the system.

A set of easy-to-install modular grips allow the P2000 to be custom-fitted to any shooter's hand. Ambidextrous slide release levers and magazine release levers make handling the P2000 natural and easy for right and left-handed shooters.

Due to its modular design, the P2000 GPM can be fitted to the individual needs of the shooter and with only a limited quantity being imported, promises to be highly collectible.

A highly reliable, safe, durable, and accurate compact pistol with significant ergonomics features, the P2000 is currently available in 9mm.

Significant features include:

- Modular grip with exchangeable back straps to easily adjust the grip size to the shooter's hand
- Ideal size and weight to comply with the requirements of the full range of police missions, including concealed carry
- Set of mounting grooves molded into the polymer frame for installing accessory lights and laser aimers
- Ambidextrous slide release (located on both sides of the frame)
- Ambidextrous magazine release
- Low profile slide and slimline, compact dimensions
- Advanced design with contoured external surfaces to avoid snagging on holster and clothing
- Polymer recoil absorber bushing (similar to the HK USP COMPACT) aids in recoil reduction
- Very short trigger reset distance to enhance the speed of multiple or follow-up shots
- Polygonal cold-hammer forged barrel for less barrel wear, better gas seal behind the bullet, and easier bore cleaning
